

FACILITIES MANAGEMENT

OVERVIEW

LSI provides logistics and facility management services to the Missile Defense Agency (MDA), Facilities, Military Construction, and Environmental Management's (DPF) Field Activity Support Services (FASS) contract. As a subcontractor to Northrop Grumman Corporation, we have provided similar facilities operations and maintenance (O&M) support to the MDA's Missile Defense Integration & Operations Center (MDIOC) in Colorado Springs, CO. We also perform preventive maintenance and reactive maintenance for the Department of Labor (DOL) at the Frances Perkins Building in Washington, DC. Work assignments such tasks as the operation and maintenance of heating, refrigeration, and air conditioning systems. The scope of these contracts is extensive, covering a broad range of logistics and engineering-related disciplines, as noted below.

FEATURES

Key functional areas supporting MDA:

- ❖ Facility Management
 - Facility operations
 - Safety
 - Security
 - Vendor interface
 - Building sustainment
 - Building Automated Systems (BAS) monitoring
 - Preventive and reactive system/equipment/facility maintenance
 - HVAC
 - Fire suppression

 - Plumbing and electrical systems
 - Critical systems oversight
 - Facility reconfiguration, remodeling and construction projects
- ❖ Logistics Management
 - Warehouse Operations
 - Shipping & receiving of expendable and non-expendable equipment and supplies
 - Inventory control
 - Storage
 - Vehicle management
 - Documentation destruction

BENEFITS

The outstanding CPARS reports that LSI's customers have provided for these contracts confirms our capability to provide effective facilities management services. Of particular note has been LSI's ability to provide quick-response support to failed systems and support, and our ability to quickly surge to respond to time-sensitive emergent customer requirements.
