

We Help Leaders Succeed

ENTERPRISE IT SOLUTION BRIEF

Information Technology is the central nervous system of today's complex organization. Success requires making wise decisions, and that means having the right information at the right time, in the right place.

With IT professionals operating throughout the world, LSI provides comprehensive, lifecycle information technology operations and consulting services. We work closely with our Government and Commercial clients to leverage their technology investments, secure their data and drive performance improvement.

From strategy to daily operations, LSI delivers IT services that help ensure the information our clients need is accessible, actionable and secure. Our expertise lies in analyzing existing systems and identifying the means for improving functionality and stability for clients with diverse and challenging IT needs.

- Application Migration/Transition to the Cloud
- Salesforce Development and Implementation
- Cloud Architecture
- Cloud Monitoring

CASE STUDY

ARMY SOLDIER SUPPORT INSTITUTE (SSI)

Customer's Challenge

Today's Soldiers require training products for a modern age that use the latest technology and allow for learning whenever / wherever. Soldiers must learn faster and more efficiently to keep up with the pace of change.

LSI's Response

LSI designed, developed and programmed mobile training applications that run natively on both Android and iOS. Built on an in-house framework to streamline development and maximize performance, LSI incorporates the latest training material in a fast-loading, mobile application. These apps contain course content, calendars, learning games, and pre-assessments reporting data directly to the SSI knowledge management system. Using video and interactive media, our team has updated SSI training for Today's Soldiers.
